WORK EXPERIENCE

Software Engineer

June 2022 – Present

Intellectual Technology Inc. | Fort Wayne, IN

- Full-stack software engineer for an online driver's license knowledge testing application primarily working with ASP.NET Core, JavaScript, Vue, and SQL.
- Orchestrated seamless integration of Salesforce, optimizing operational efficiency and significantly improving customer satisfaction through streamlined processes and enhanced service delivery.
- Developed a solution to mark expired assets for deletion to comply with data retention requirements.
- Created and implemented a cloud-stored device setting service for vehicle inspection devices using Cordova and JavaScript.

Systems Developer

Dec. 2021 – June 2022

Intern

Feb. 2020 – Dec. 2021

MedPro Group | Fort Wayne, IN

- Utilized TypeScript and the SPFx framework to develop modern webparts.
- Developed and implemented JavaScript applications to streamline business processes.
- Assisted with maintaining and updating the content hosted on an Office 365 ecosystem.

EDUCATION

Bachelor of Arts in Computer Science | Purdue University Fort Wayne

May 2022

- GPA: 3.31/4.0

PROJECTS

Valid USA's Revision Viewer

TypeScript, React, Bootstrap, Sass

- Web-based workflow module designed to provide database revision history in an easy-to-digest format.
- Integrates with Valid USA's API framework, supporting various entities to track revision changes and store user preferences for configuration settings.
